Artificial intelligence a modern approach

The application in
healthcare, industry and
more. The fascinating topic
of machine learning and
prediction machines. The
complexity explained for
beginners

[Chris Baker]

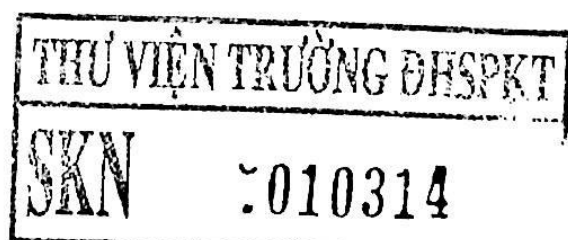

Table of Contents

Introduction	1
Chapter 1: Brief history of artificial intelligence	10
Brief History of Artificial Intelligence	10
The Basic Concept	12
The Application We Know	13
The Applications We're Creating	17
The Information Age	18
The Fourth Industrial Revolution	20
Threats of AI	23
Chapter 2: The challenge and the promise of Artificial Intelligence	28
Chapter 3: Myths of Artificial Intelligence	35
Chapter 4: The state of art of machine learning	43
What Is Machine Learning?	43

How Machine Learning Differs From Artificial Intelligence	43
How Machine Learning Works	44
Machine Learning Steps	45
Real Life Problem	45
Step 1: Creation of a model	46
Step 2: Providing input	47
Step 3: Learning	47
Unsupervised Machine Learning	49
Reinforcement Machine Learning	51
Limitation of Machine Learning	53
Time constraints	53
Imperfect prediction	54
Variability problem	55
Uses of machine algorithm is limited	55

Chapter 5: Artificial neural networks applied to machine learning..... 57

Natural Language Processing	66
What is it and What is it Used For?	66

Well, Why NLP?.....	67
Well, How Does NLP Work?	68
Semantic Analysis	70
Problems.....	71
Activities Involved in Natural Language Processing .	72
How NLP is Changing Search and Customer Service	75
Chapter 6: Is it possible to build reliable prediction machines?	78
The AI Key to Opening IoT Potential	79
AI and IOT Working Together	80
Chapter 7: How can we build an AI ready culture	85
What is a Recommendation Engine?	87
Artificial Intelligence and the Job Market	95
All Jobs Will Be Replaced	95
Even the Creative Jobs.....	97
What do you need to know to implement A.I.? ...	98
Easier Than Ever	98

Algebra to Calculus	99
Programming	100
Repetitive Tasks Are the First to Go	101
Jobs carried out via Rules Go Second	102
Consultancy Goes Third	103
Which jobs are least likely to be replaced?	104
Inventors	104
Frontier Science	105
Will Universal Basic Income fix the problem? ...	105
Giving Everyone a Base Income	105
Companies Pass Cost to Customer	107
Devalue the Currency	107
Everything is Now the Same but Worse	109
The Future of AI: Separating Fact from Fiction .	109
Chapter 8: Our daily lives with AI	119
Reasons Why Industry Experts Are Warning Us about AI	136
Companies should self-regulate their AI technology	138

Artificial intelligence may not align with our goals 139

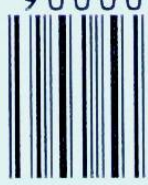

We don't know how to control artificial intelligence140

Artificial intelligence will increase inequality 141

Conclusion 143
